

**Exhibit 5.1.1**

Obligation to provide Information

Within up to ninety (90) days after the date of execution of the Agreement, the Companies of Oi Group shall provide the following information so as to enable migration, by Buyer[s], as from the Closing Date, of the businesses operated by the SPE Movable to the respective bases and platforms of Buyer[s] with no interruption and within the shortest possible term.

None of the information provided for in this Exhibit 5.1.1 shall be performed if (i) it violates any Law, any provision of the Judicial Reorganization Plan or of the Public Notice or the Antitrust Protocol executed by the Parties; or (ii) it damages the obtainment of any necessary approval or consent, pursuant to Clauses 4.1 to 4.3 of the Agreement, regarding the implementation of the plan of segregation and allotment of the Assets, Obligations and Rights of UPI Movable Assets between Buyer[s] or upon Closing.

Any and all processing by the Parties of personal data shall be performed strictly in compliance with the laws in force related to the subject of data protection, it being ensured to data subjects the due transparency of any processing and guaranteeing maintenance of an appropriate security standard, capable of protecting the personal data involved.

The information shall be provided as from the date of execution of the Agreement, in accordance with the confidentiality parameters established within the scope of the Antitrust Protocol.

**1. IT**

*1.1. Information related to the current plans*

- (i) Inform plans per segment (PREPAID, POSTPAID, Control, SMB, corporate, etc.) and wide range of number of clients in each plan;
- (ii) Inform the plan and explanation/information of how the offers for each plan work, providing information on the plans and offers based on a template to be submitted by Buyer[s] within the scope of the Migration Monitoring Committee, so that Buyer[s] may create the necessary plans and offers in their systems before the start of the execution phase of client migration. The template will detail information on segmentation and macro characteristics of the offer, voice call limits, voice services (PUC - provision, usefulness, convenience), data packages, SVAs included in the offer, detached SVAs, dependents and sharing, extra benefits, features of communication and information to client, life cycle of the offer, life cycle of the client, channel restrictions and advantages;
- (iii) Inform all complementary services (network) of the main plans and describe them / which platforms they service and what type of provisioning they require;
- (iv) Inform all URA short codes/services of the network and indicate whether or not they are subject to fees on the platforms or mediation;

- (v) Explain how the offers of the control plans work, as well as the particularities of the migrations between Postpaid and Prepaid Segments to Control and vice-versa (History Behavior, pro-rata, credits, etc.);
- (vi) Describe the existing VAS with partners and how they work;
- (vii) Provide information of all types, recharge channels and amounts offered to clients of each segment, including their term of validity and expiry;
- (viii) Inform how the eligibility to available offers and discounts works;
- (ix) Inform all available plug-ins and Service packages, or optional Data, including description of how they work and eligibility; and
- (x) Provide the list of all third-party service partners and contracts.

*1.2. Information related to contracts with financial institutions*

- (i) Inform all existing bank agreements and contracts (how they work).

*1.3. Information related to collection*

- (i) Inform all billing cycles / cut-off and expiry dates, with the respective volume of clients in each cycle;
- (ii) Describe in detail how the Print Centers work;
- (iii) Inform the types and models of accounts made available to postpaid and Control clients, as well as means of access/consultation and the client volume per type;
- (iv) Inform the standard to record network cells that appear on the mediation tickets;
- (v) Inform the collection timeline per product/segment, describe the stages of such collection timeline and the actions that will be performed (how the actions work); and
- (vi) Describe how the co-billing contracts work.

*1.4. Information related to B2B*

- (i) Inform M2M / Corporate and the aggregate number of clients, without individualizing such client information; and
- (ii) Inform how VPN / M2M services and Offers work.

*1.5. Other information*

- (i) Describe how the roaming agreements work, including pricing models of each one;
- (ii) Describe how the document center works (clients' documents and executed instruments storage); and
- (iii) Inform the mapping of all Rating Groups and Data Policies per type of transferred service, used in Oi's products.

## **2. Network**

### *2.1. Information related to the use of access (necessary for preparation of the network for the traffic to be received by Buyer[s])*

- (i) Information on Oi's access (per site: location - latitude/longitude, traffic, technologies, supplier, bands, RAN sharing, etc.);
- (ii) PLMN per region;
- (iii) Full information on the IMSI basis of Oi and IMSI distribution rules;
- (iv) Inform all Data APNs used by Oi clients according to the type of user (Prepaid, Postpaid, Control, M2M and their particularities);
- (v) Spectrum per region.

### *2.2. Information related to the core (necessary to prepare the integration of the core of Buyer[s] into the core of Oi)*

- (i) Information on the data traffic of each core element of Oi's data;
- (ii) Information of voice traffic per region (traffic interest);
- (iii) Information on the capacity of the platforms, in terms of TPS and base size: HSS, HLR, AuC, MME, EDNS, DRA (SLF), DEA, STP (FNR), S/P-GW, S/GGSN, OTA, FDA, USSD, MMS, SMSC, Anti-Spam, PCRF, CTF, BigData Platform Device Manager, Service Manager, WAP, EIR, GMLC/SMLC, Voice Mail, IVR, Ring Back Tone, SIM Browsing, Provisioning, Inter-AS;
- (iv) Information on all user profiles in HLR/HSS/AuC, including proprietary and specific ones, used in 2G/3G/4G, and description of specific blockages that may exist;
- (v) Description of the interactions with SRF and IVR for services based on IN;
- (vi) Description of the forwarding plan for voice services (special numbers);

- (vii) Specification and information of the resources of Core CS (MSC) necessary to serve Oi users (e.g.: automated call response machines, for selection purposes, etc.);
- (viii) Information on voice traffic between Oi and local interconnection routes with fixed route, also contemplating the interconnection traffic with the mobile telephony companies and other long-distance operators;
- (ix) Anonymized information and technical specifications of legal-entity clients and individual clients, including APN and M2M;
- (x) Information on the services available for companies, and the base for each case (CSD, VPN, etc.);
- (xi) Information on the services available for individual clients (MMS, backup agenda, services on the chip, LA SMS, speed dialing, etc.);
- (xii) Information on the IR.21 that Oi has for roaming agreements;
- (xiii) Information on the roaming services available at Oi and the respective service platforms (e.g. VHE, steering of roaming, etc.);
- (xiv) Information on the GT (Global Title) and PC (Point Code) addresses of all elements of Oi's Network;
- (xv) Information on the total number of entries that may be coded in the DRA (SLF) and STP (FNR) tables of Oi's Network;
- (xvi) Information on the blocking rules used by the Anti-Spam Platform for the SMS P2P, P2A and A2P traffic
- (xvii) Information on all IP addresses of the SGSN, GGSN, S-GW and P-GW of OI for Data Core integration of Buyer[s];
- (xviii) Information on the IP addresses of STPs and DEAs of OI for integration with the STPs and DEAs of Buyer[s];
- (xix) Information on the provisioning parameters and policies applied on PCRF for routing, pricing and disposal of the traffic of Oi's clients;
- (xx) Information on the Short Codes of SMS (P2P, P2A and A2P) used on Oi's Network, from the number of each Short Code to the type of Service or associated partners;
- (xxi) Sharing of image of the Electric Profile (Applets, EFs, Vendor, ICCID Format, Software Version, Security keys) loaded on Simcards and OTA Platform of Oi;
- (xxii) Sharing of image of the Electric Profile (Applets, EFs, Vendor, ICCID Format, Software Version, Security keys, 3GPP Release of SIM card)

loaded on the Simcards of Oi, as well as the image of Simcard set up on OTA Platform and the Menu Tree coded on Service Manager;

- (xxiii) Sharing of the information associated to the navigation mechanism of SimBrowsing, from the Applet installed on the Simcard to the S@T Byte Codes and Alias Code currently updated at Oi;
- (xxiv) Sharing of the information associated to the navigation mechanism via USSD, from the Short Code used up to the Menu made available for Oi's clients
- (xxv) Information on the type of authentication key (e.g.: OP, TK) used by HLR, HSS, AuC elements, as well as the details on the format and encryption and authentication algorithms (e.g.: Comp128v2, Comp128v3, Milenage)
- (xxvi) Information on the type of OTA administrative key (e.g.: MK, TK) used by OTA Platform, as well as the details on the format and encryption and authentication algorithms;
- (xxvii) Information on the services associated to LBS (Advertising, Emergency Services - on voice, SMS, etc.);
- (xxviii) Information on feature packages already contracted and customizations per supplier, for the Voice Core, Data, Signaling and SVA Platform elements; and

### **3. Sales support and customer service**

- (i) Information on the indirect sales channels (dealers, franchises, telephone sales, etc.) currently used by Oi that may be transferred to SPE Movable, including descriptions of contracts and operating procedures.
